# A Brief Recap

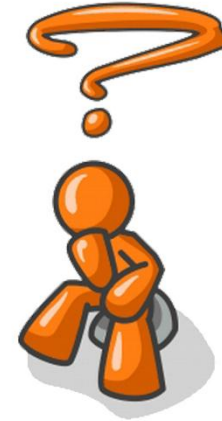

---

- Discussed the **challenges** facing the industry to meet the existing obligations and proposed increased penalties
- Demonstrated how **FlexiCadaastre** has been configured to meet the **MPRDA** requirements to effectively manage Mineral Rights

- Risk mitigation** by providing an early warning system
- Secure and accessible** data and document repository
- Automated **Management Reports**
- Improves **Governance and Compliance** with Mining Law & Regulations

**Do you feel that your current system is not meeting ALL of your requirements? ...**

# We can assist by ...

---

## Step 1: Scoping Study

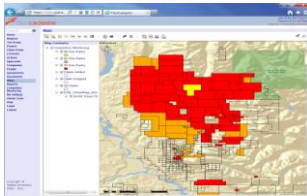

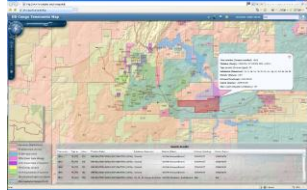

- Identify corporate requirements
  - Review existing business processes and data
  - Engage with all stakeholders, identifying key staff
  - Basic FlexiCadastre orientation training
- Deliverable: **Project Charter**
- Project Scope and functional deliverables
  - Project Plan (timeframe and resources)
  - Budget

# Followed by

---

## Step 2: Implementation of Project Milestones

- **Design workflows** in conjunction with the organisation
- FlexiCadaastre **configured** to your requirements
- Mapping and import of legacy **data**
- **Training** & Documentation
- Install and commission the Staging/**Test site**
- User Acceptance Tests – signed off
- Production site, **“Go-Live”**
- Ongoing user **support**
