

ArcGIS Pro for Natural Resources

Peter Will

Esri Global Business Development Lead – Mineral Extraction Industries

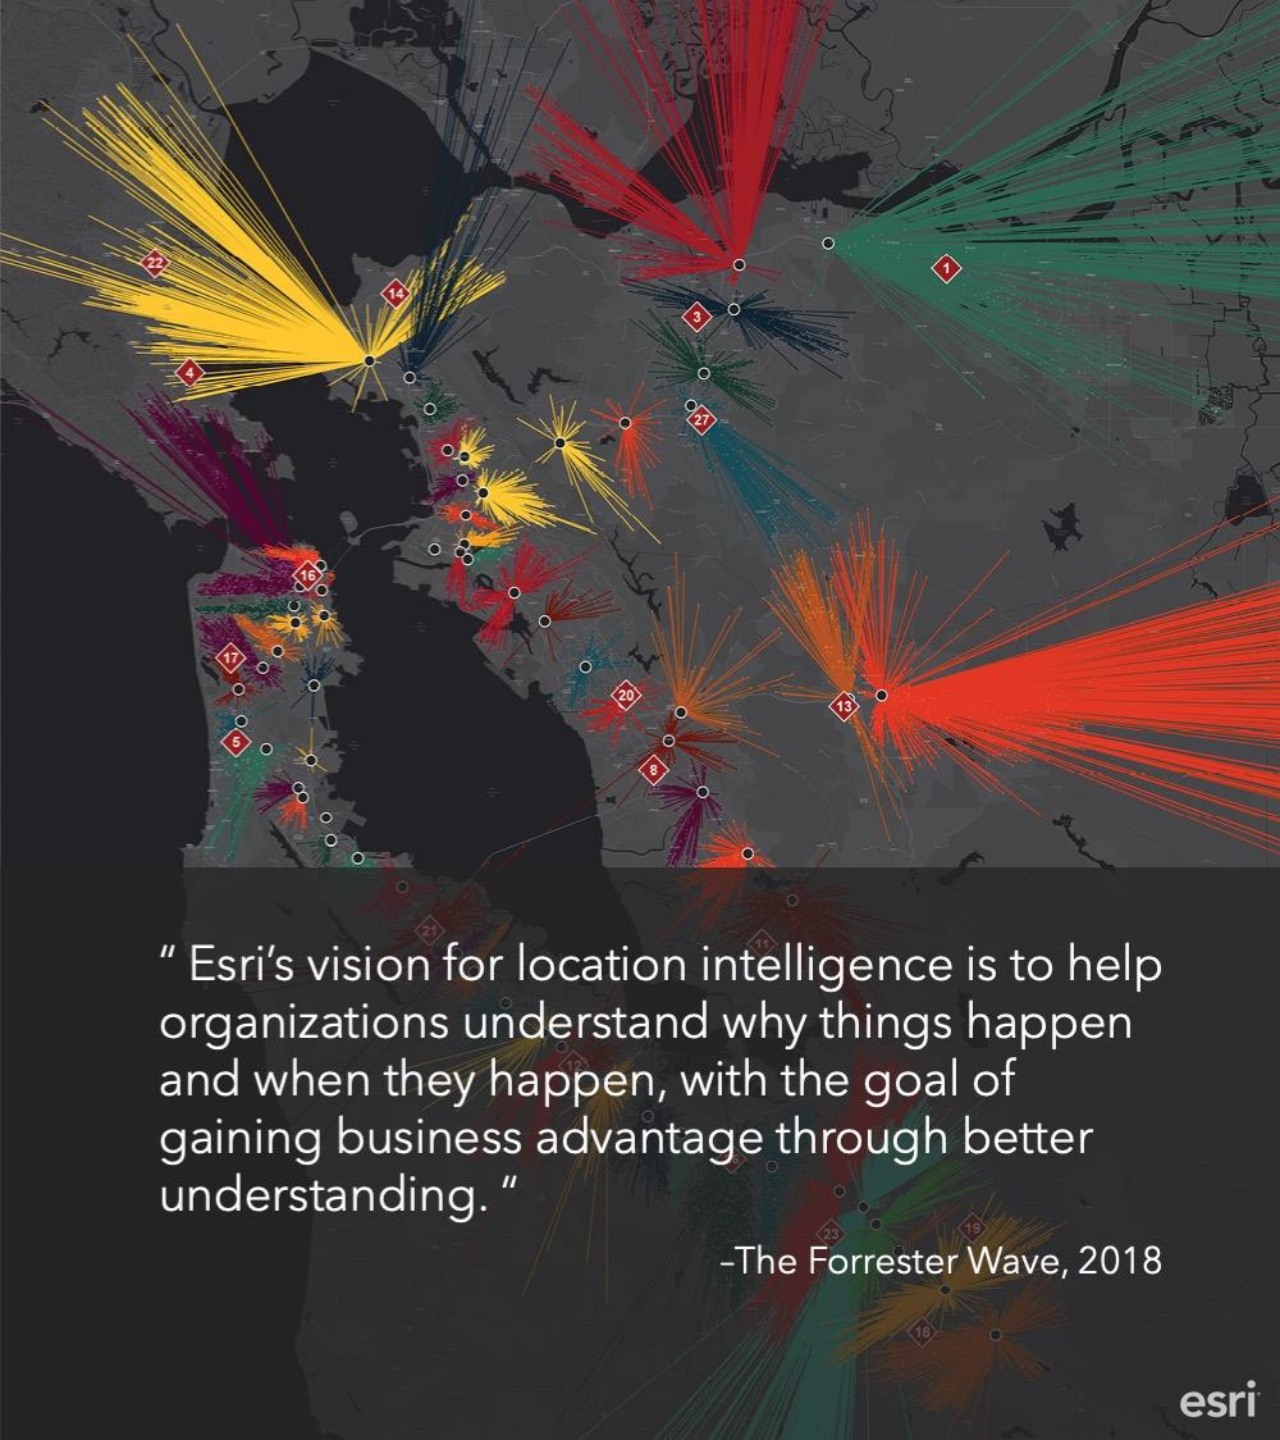

Agenda

- Overview of Esri
- History of the Trimble, Landfolio, & Esri Relationship
- The “ArcGIS System”
- An ArcGIS Pro Deep Dive
- Questions & Use-cases examples

WHO WE ARE

Esri is the global leader in geographic information systems (GIS) software, location intelligence, and mapping.

With more than 100 offices worldwide and professionals from 67 countries, Esri provides organizations of every size and industry the tools to get deeper insights from their geographic and transactional data to improve operational and business results.

“ Esri’s vision for location intelligence is to help organizations understand why things happen and when they happen, with the goal of gaining business advantage through better understanding. ”

-The Forrester Wave, 2018

OUR TECHNOLOGY

Esri builds ArcGIS, the leading mapping and spatial analytics software for desktop, software as a service, and enterprise applications. ArcGIS is the heart of the Esri **Geospatial Cloud**. With the geospatial cloud, people can create maps that can represent thousands of relationships between hundreds of data layers including **IoT** streams. Esri ArcGIS products are designed to deliver **location intelligence** and meet **digital transformation** needs for organizations of all sizes.

Geospatial Capabilities

- Mapping & Location Enablement
- Field Operations
- Spatial Analytics & Data Science
- Imagery Management & Analytics
- Real-Time Visualization & Analytics
- 3D Visualization & Analytics
- Developer Tools & Services
- Data Management
- Location Analytics & Spatial BI

Esri offers "some of the most extensive capabilities for capturing spatial data and the analyses, presentation, and delivery of spatial insights."

– Forrester

The Esri, Landfolio, & Trimble Business Partner Story

The partnership between Esri, Spatial Dimension (now Landfolio), and Trimble goes back more than 20 years...

- Spatial Dimension was a Esri Business Partner since 2003
- Trimble has been a Esri Business Partner since 2001

Esri Natural Resources

What is a GIS to a Nat Resource Company?

- Mining
- Petroleum
- Pipeline
- Renewables
- Agriculture
- Forestry

and Services

Services

A Modern GIS Should Weave Together Three Essential Systems

GIS

System of Engagement

System of Insight

System of Record

ArcGIS | Common Patterns of Use

Mapping & Visualization

Understand locations and relationships with maps and visual representations

Data Management

Collect, organize, and maintain accurate locations and details about assets and resources

Field Mobility

Manage and enable a mobile workforce to collect and access information in the field

Monitoring

Track, manage, and monitor assets and resources in real-time

Analytics

Discover, quantify, and predict trends and patterns to improve outcomes

Design & Planning

Evaluate alternative solutions and create optimal designs

Decision Support

Gain situational awareness, and enable information-driven decision making

Constituent Engagement

Communicate and collaborate with citizens and external communities of interest

Sharing & Collaboration

Empower everyone to easily discover, use, make, and share geographic information

Enabling Location Across the Natural Resources Industries

Exploration

- Satellite Imagery
- Paleo-mapping
- Soil Sampling
- Drill Program Planning

Feasibility Assessment & Permitting

- Permitting
- Environmental feasibility
- Surveying

Operations

- Mine Planning & Design
- Digital Twin
- Mine Wall Safety
- Heap Leach Modelling
- Blast hole mapping

Logistics & Sales

- Supply Chain Mapping
- Market Analysis
- Inventory Management

HSE & Compliance

- Tailing Dam Inspections
- Monitoring Wells

Reclamation

- Invasive Species Monitoring
- Top soil cover Monitoring
- Reseeding Monitoring

External Communication

- Investor Relations
- Community Engagement
- Corporate website map

The Spatial Journey to ArcGIS Pro

Embracing Modern Esri GIS Technology

ArcGIS
Pro

ArcMap

1999

ArcView®

1992

ArcInfo™

1982

2015

ArcMAP Retired? | NO not yet

- Is ArcMap going away? - NO
- Has ArcMap Equivalency been achieved? – Yes (?)
- Are Esri's BP's plugins Upgraded? – Most (?)
- Is there a defined Migration Path I can follow – YES
- Is ArcGIS Pro a separate license – NO
- Can I still contact Technical Support – Yes, until March 01, 2026

ArcGIS Pro | Continuous Improvements & Developments

Pro 3.0

Near Term

- Upgrade Python Environment
- Knowledge Graphs
- Projects in the Enterprise
- Roof Editing in Stereo
- Dynamic Feature Clustering
- Animated Symbols
- Big Data Analytic Warehouses
- Presence-only Prediction
- Change Point Detection
- Suitability Modeler Sharing
- Parcel Fabric 3D Cadaster
- **Voxel Layer Sharing**
- Reality Mapping Extension

Mid-term

- Catalog Layers
- Point Cloud Scene Layer Data Management
- Simulation Modeling
- Presentations
- Spatio-temporal Density Analysis
- Multiscale GWR
- Scientific Data Ingestion
- **Parcel Lineage Visualization**
- **Parcel Fabric Coordinate Based**
- Cadaster
- Managed Indoor Data Pipeline
- ENC Chart Viewing
- Enhanced Radar data support

Long-term

- Terrain Editing
- Materials Authoring
- High Fidelity Rendering
- 3D Mesh as Ground
- Integrated Mesh Scene Layer Data Management
- 64-Bit Object ID
- New Data Types (BigInteger, Timestamp with Time zone)
- **Cloud Drive support**
- **Mobile Geodatabases**

ArcGIS Pro | Integration Focused

Spatial Analytics &
Visualization

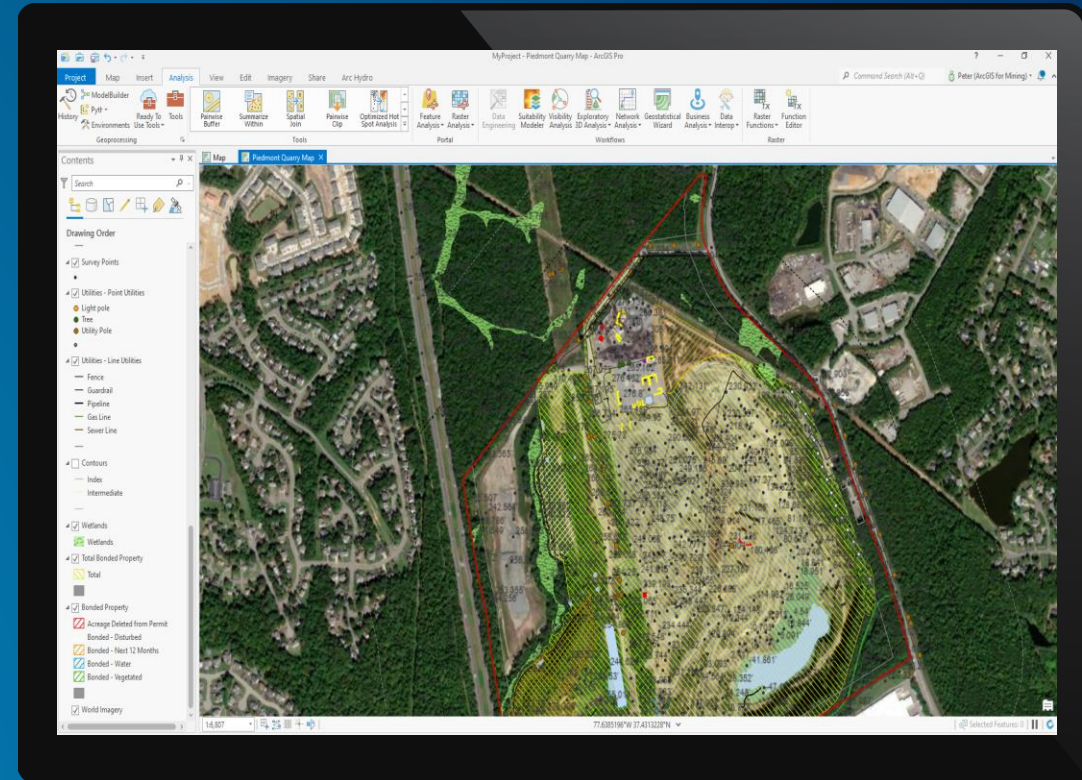

Data
Management

Sharing & Collaboration

ArcGIS Pro | Spatial Analytics & Visualization

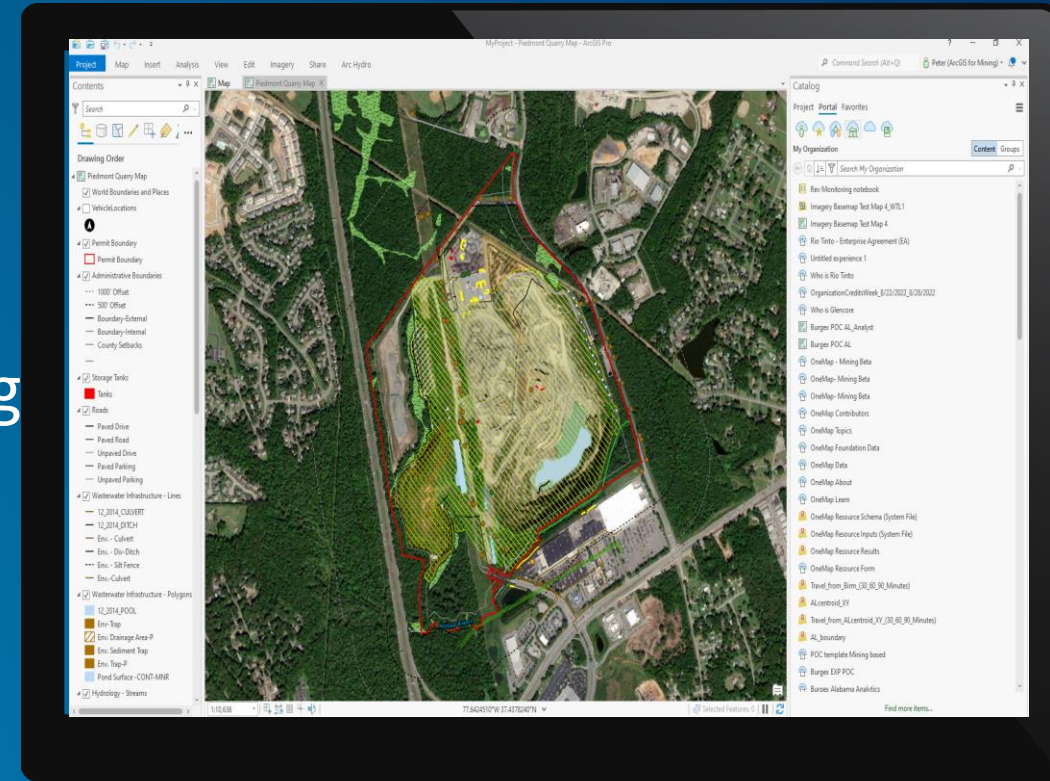

- 200 tools in 25 toolsets for performing spatial analysis and modeling
- New charting and statistics tools...
- Integrated 2D, 3D, & 4D visualization
- Complete image management, visualization, and analytics
- Industry-specific plugins extend functionality

Data Analysis

ArcGIS Pro | Data Management

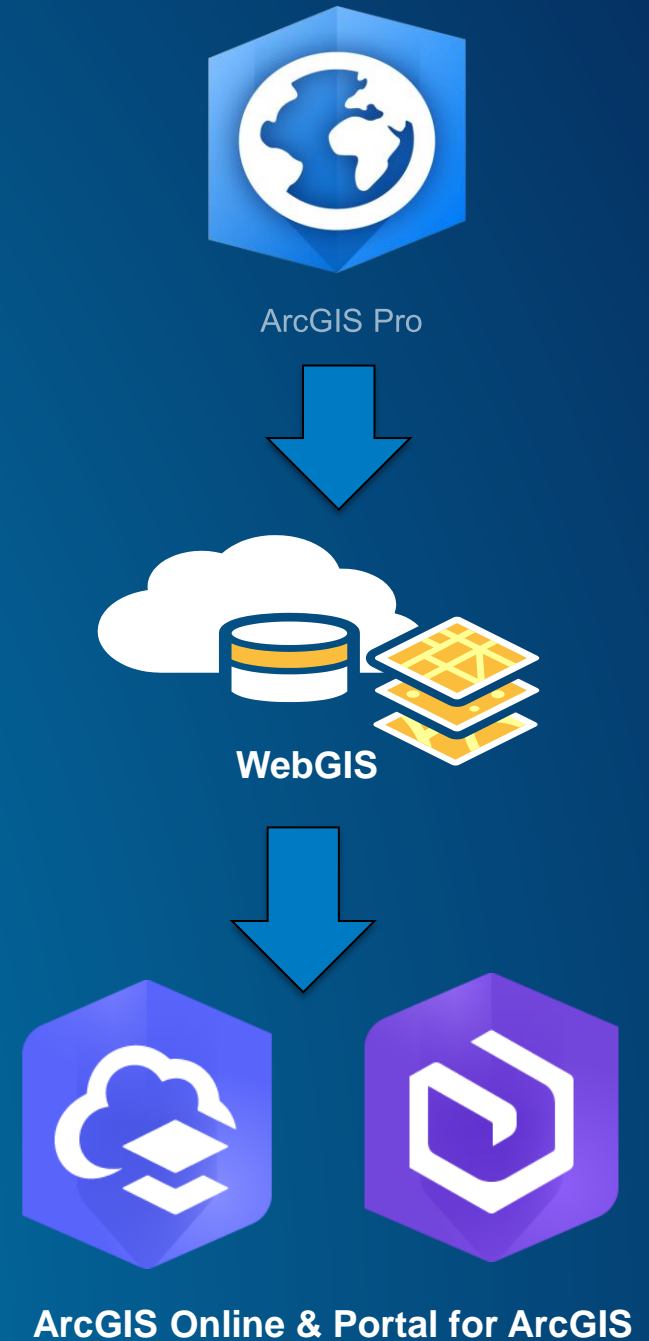

- **Over 20** Data Management toolsets
- **Simplified** data editing experience
- **New** project-based folder structure
- **Single** application for managing data & running analysis (no more ArcCatalog)
- **Pro** is a connected application w/ the ability to connect to outside web-services connecting key reference layers

Data Management

ArcGIS Pro | Sharing & Collaboration

- ArcGIS Pro is a connected desktop
- Communicate and share this information effectively
- Leverage web services architecture
- Standardize access to authoritative data and resources

ArcGIS Pro | Top 10

1. **Speed** – ArcGIS Pro is multi-threaded, 64-bit & made to run processes fast
2. **Ribbon Interface** - GIS meets Microsoft Office
3. **Improved Editing** - enables you to MacGyver your data in unique ways.
4. **Remote Sensing & Imagery** - image classification wizard, AI, ML, & a Deep Learning framework
5. **Scripting** - Put it in cruise control
6. **Rater Analysis** - impressive 1500+ geoprocessing tool count
7. **Labeling** – much improved labeling
8. **Statics & Reporting** - chart types like data clocks, rose diagrams, temporal charts, and calendar heat maps **make your stats stand out.**
9. **Animation** - make temporal data that maps can come alive
10. **3D** - Full 3D editing plus line of sight, shadow, and skyline.

Embrace Change

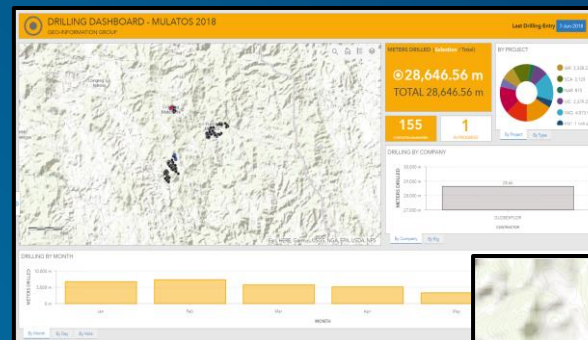

- Software companies need to evolve or go extinct so we keep evolving
- The only constant on the face of the earth is change

Thank You!
