

Spatial Dimension User Conference

2011

South African Jurisdiction: Surface Rights VS. Mineral Rights

Jim Crotty

(Anglo American - Platinum Business Unit)

André Oosthuizen

(Spatial Dimension)

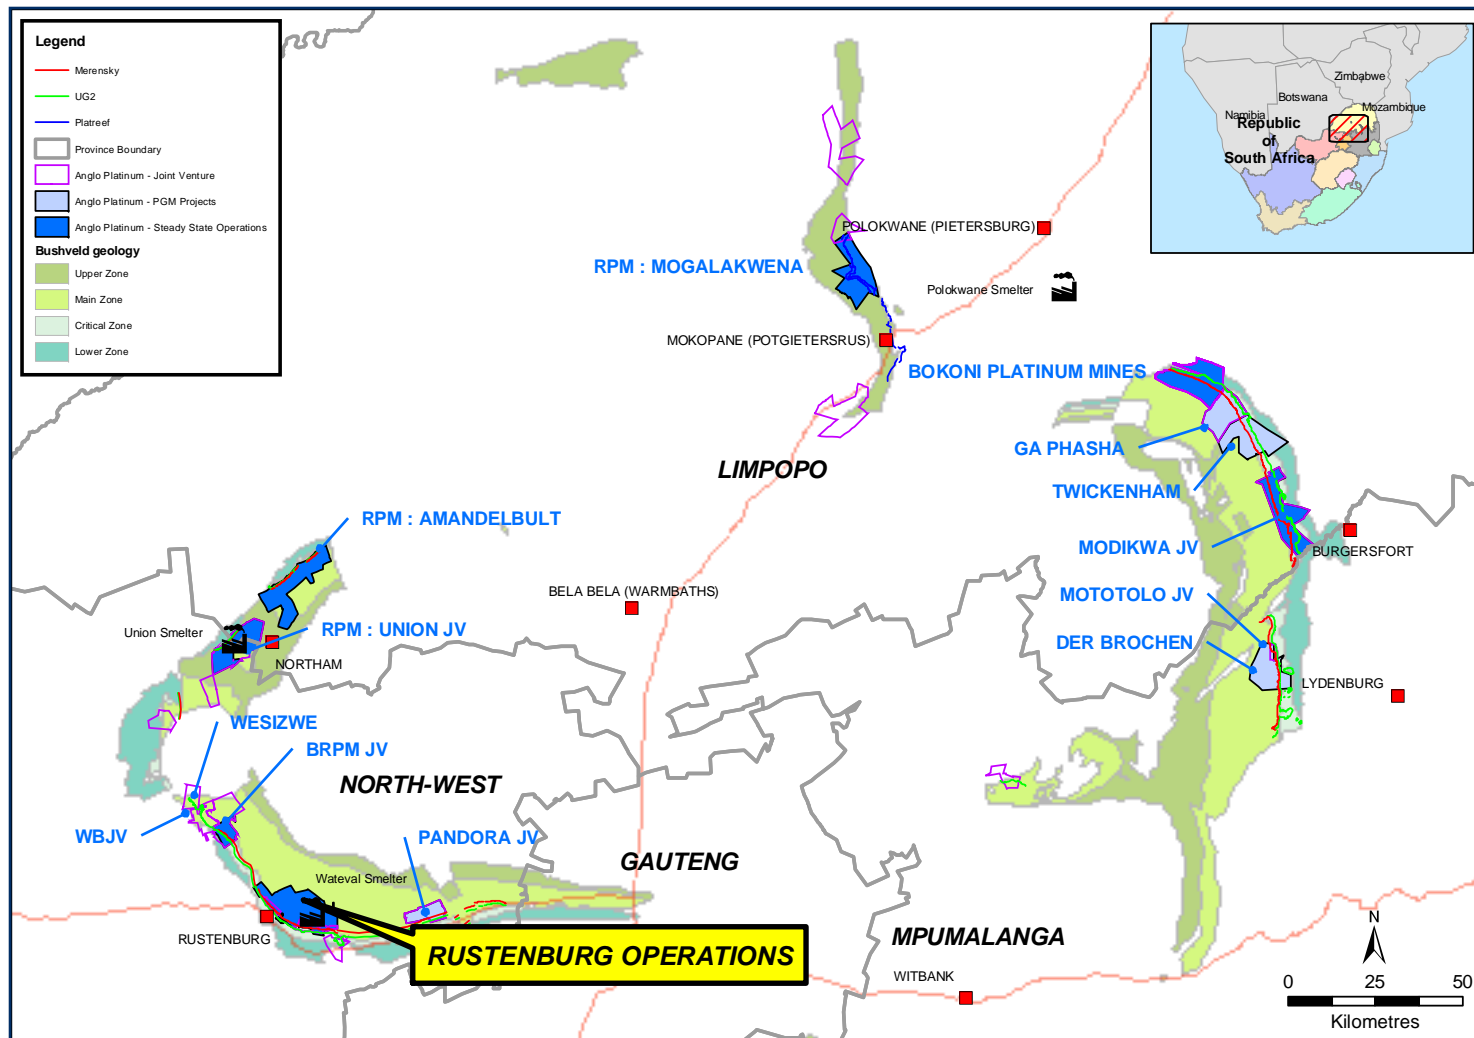

Overview

- Introduction
- Problem
- Objective
- Solution
- Implementation
- How the Data Model was derived
- Resultant Data Model
- Pitfalls
- Conclusions

Who, What, Where...

- World's largest Platinum Group Metals mining company
- Production per annum (2010)
 - ~2.55 Million oz Platinum
 - ~1.44 Million oz Palladium
 - ~4.93 Million oz PGMs (Platinum, Palladium, Rhodium & Gold)
- Operations & projects located in Southern Africa
- Employ 45,000 people directly and use 8,000 contractors
- 15 individual mining operations
- Either wholly owned or in joint venture
- Socially & environmentally responsible company

Regional Location

Rights / Assets / Licences

- **Surface**

- Freehold – Residential (3846)
- Freehold – Farmland (143)
- Freehold - Industrial (9)
- Freehold – Business (0)
- Real Rights (14)
- Servitude (81)
- Surface Lease (24)
- Surface Right Permit (567)

- **Mineral**

- Mineral Lease (60)
- Prospecting Right (44)
- Mining Right (23)
- Reconnaissance Right (0)
- Old Order (413)
- Water Right (1)

The Problem

- Legacy System
- In-house
- Still required development to accommodate new legislation
- Inefficient – required significant development costs
- Inflexible – not user friendly
- Governance -not workflow driven

Objectives

- Determine Best Practice
 - Identify suitable system
 - Implement
 - Design Data Model
 - Attempt to determine cost effectiveness
- Implement Best Practice
 - incorporate into Group Procedures

Identified Solution Requirements

- Needs to address internal & external governance
- Needs to become a Group Standard
- Needs to be efficient and flexible
- Needs to be scalable
- Needs to address DMR requirements within the SA jurisdiction
- Needs to be cost effective

The Solution Was...

- Flexicadaastre...of course!
- Which was derived from
 - Presentations
 - Demonstrations
 - Existing user interviews
 - Acceptable proposal that was in budget
 - Adherence to AA PLC policy
 - *“Flexicadaastre is the preferred solution within the land-use/mineral rights management space”*
...Dave Drinkwater (Manager: Mining Systems & Information)

Implementation- project overview

- Installation
- Workshop – familiarization
- High Level work Flow
- Internal Business mapping
 - Client driven
 - Vendor driven
- Follow up Workshop and sign-off
- Flexicadastre Configuration based on signed-off workflows
- Migration and integration with existing systems
- Pre SAT/UAT Training
- UAT & SAT
- Final Configuration based on results of UAT & SAT
- Go live

Data model generation

- Due to time & budget constraints it was decided to model a single right/asset/licence group
- Focused on most important group of rights to manage
 - Prospecting rights
- In depth work- flow modelling produced the required data model
- Combined effort between client & vendor

Platinum - Group Procedure

GROUP PROCEDURE

ACQUIRE PROSPECTING RIGHT

VERSION: Version 1.00

LAST REVISION DATE: 03/11/2010

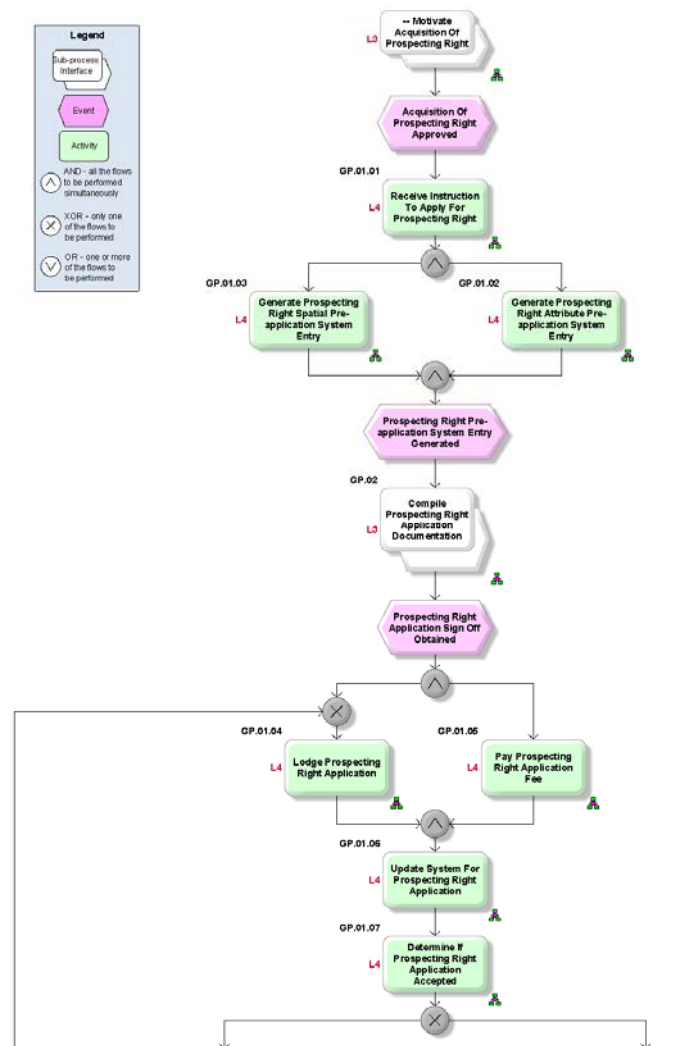

FIRST IMPLEMENTATION DATE: 01/12/2010

DOCUMENT REFERENCE NUMBER: <Not Allocated>

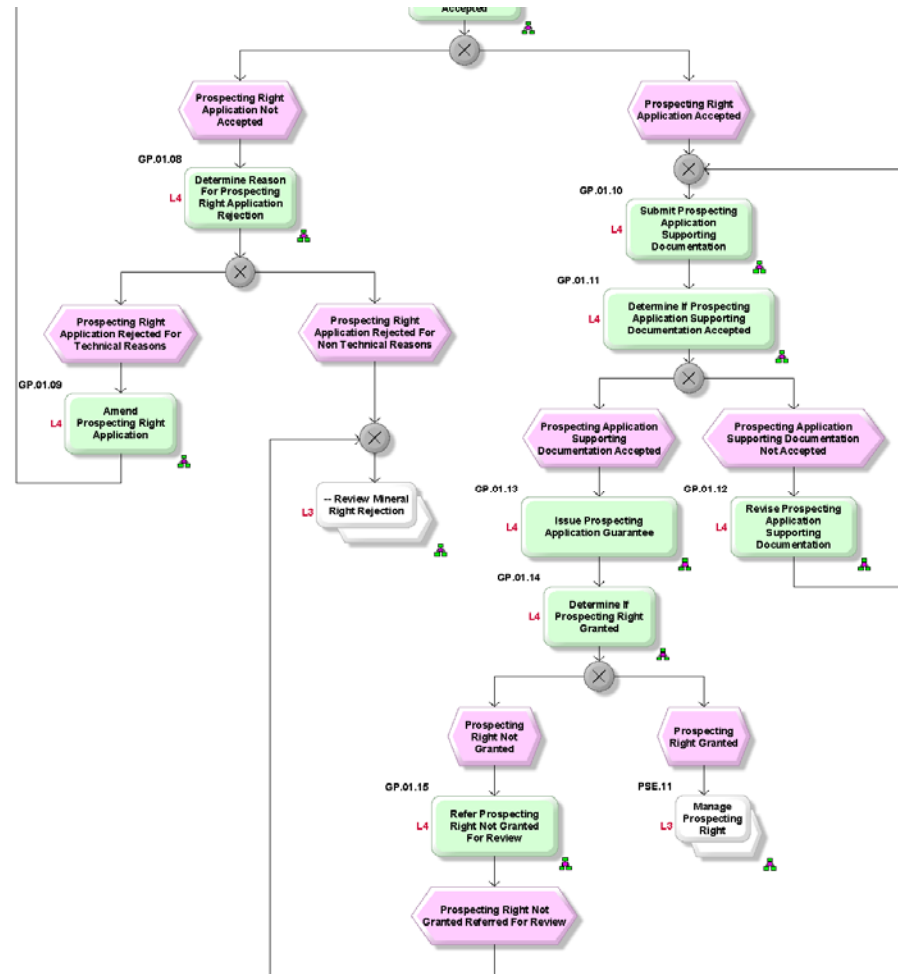

PROCESS REFERENCE NUMBER: GP.01

	NAME	POSITION	SIGNATURE	DATE
AUTHOR:	Jim Crotty	GIS Manager		
REVIEWED BY:	Barry Jones	Exploration Geologist		
REVIEWED BY:	Imogene Groothuizen	Paralegal		
RECOMMENDED BY:	Donovan Andersen	Manager Survey And MRM Systems		
RECOMMENDED BY:	Henri Nieuwoudt	Head Of Mining And Property Law SA		
RECOMMENDED BY:	Quartus Snyman	Manager Geology		
RECOMMENDED BY:	Gordon Smith	Head Mineral Resource Management		
APPROVED BY:	Pieter Louw	Executive Head Mining		

Aris Work Flow Model 1

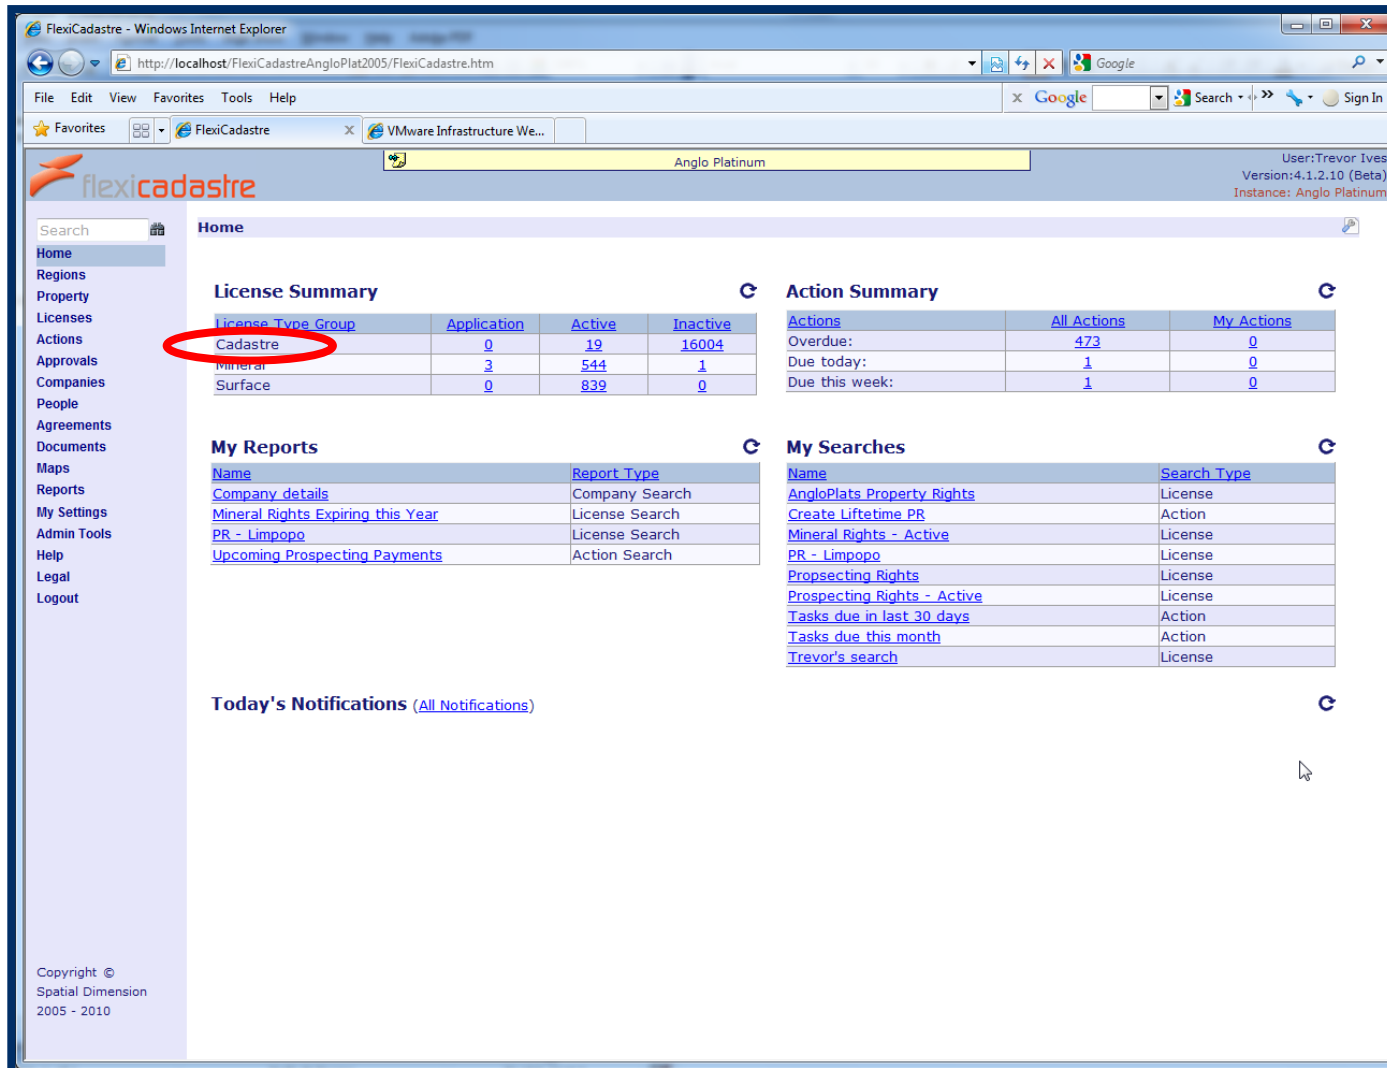

Aris Work Flow Model 2

The Data Model

- Key concepts were:
 - Majority of rights/assets/licence shapes based on surface freehold shape (>90%)
 - Flexicadaastre designed to work efficiently with coordinate entry licence shape
 - Needed to create alternative licence shape generation concept
 - Loaded generic group of licences (property) from which other rights/asset/licences could be built
 - The property licences were derived from the same source the DMR used for their management system

Map Screen Shot

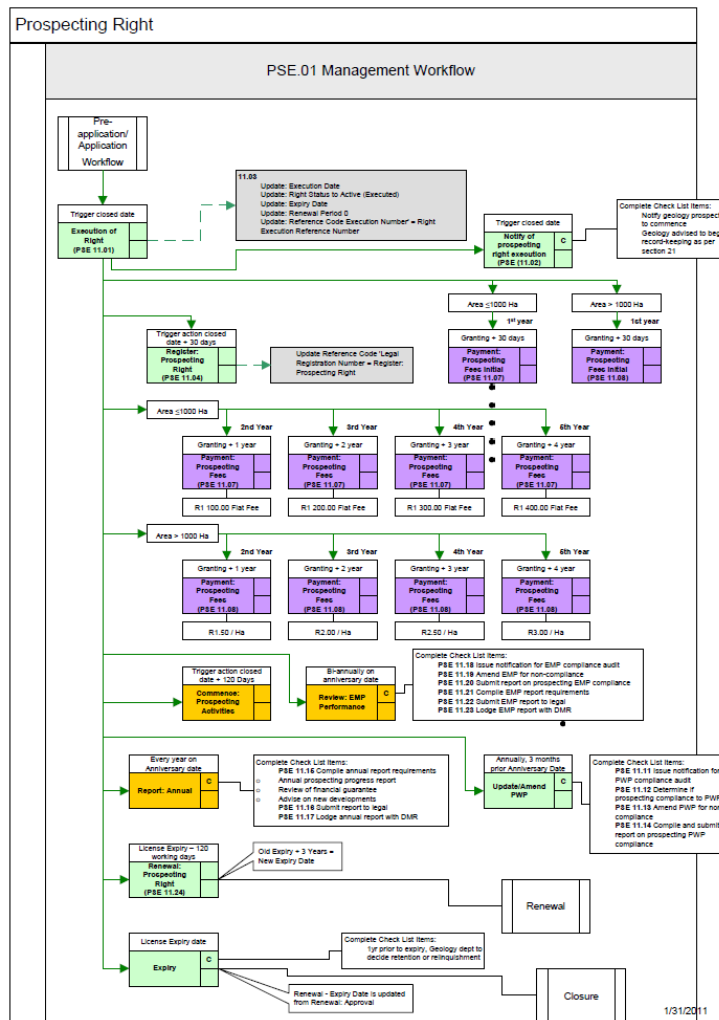

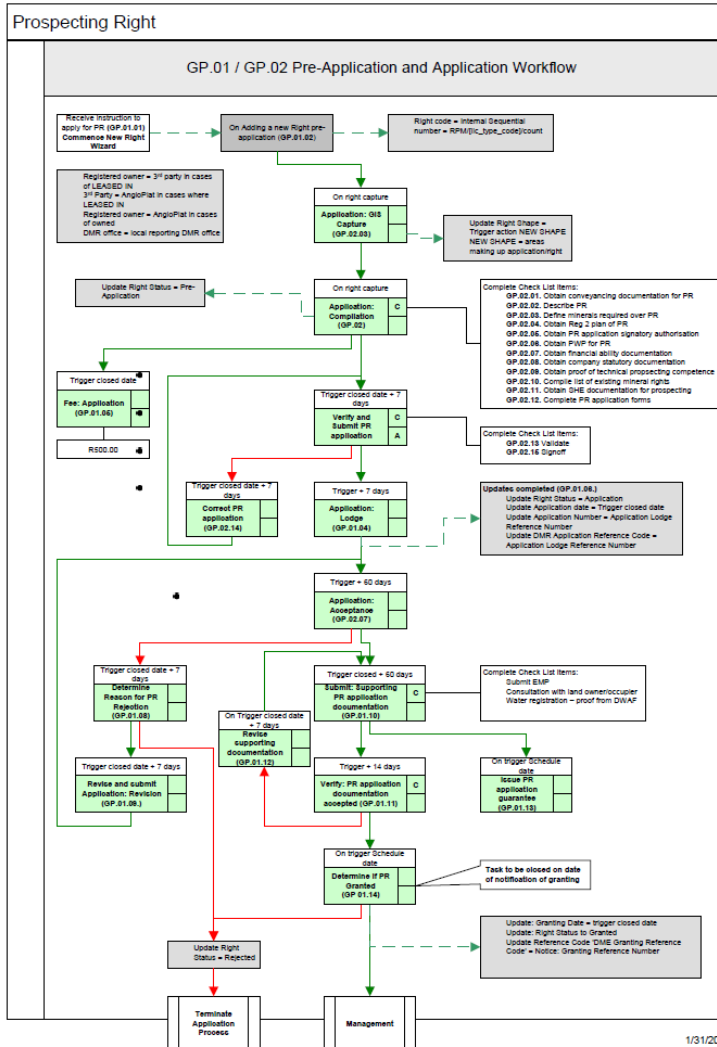

Data Model

- Management of Mineral Rights linked spatially to Surface Rights
- Workflows had to strictly adhere to:
 - internal requirements (governance and audit)
 - external requirements (DMR legislation)
- Resultant model combined both surface and mineral right management by referencing them to third group of licences referred to as generic properties...through the related licence tab

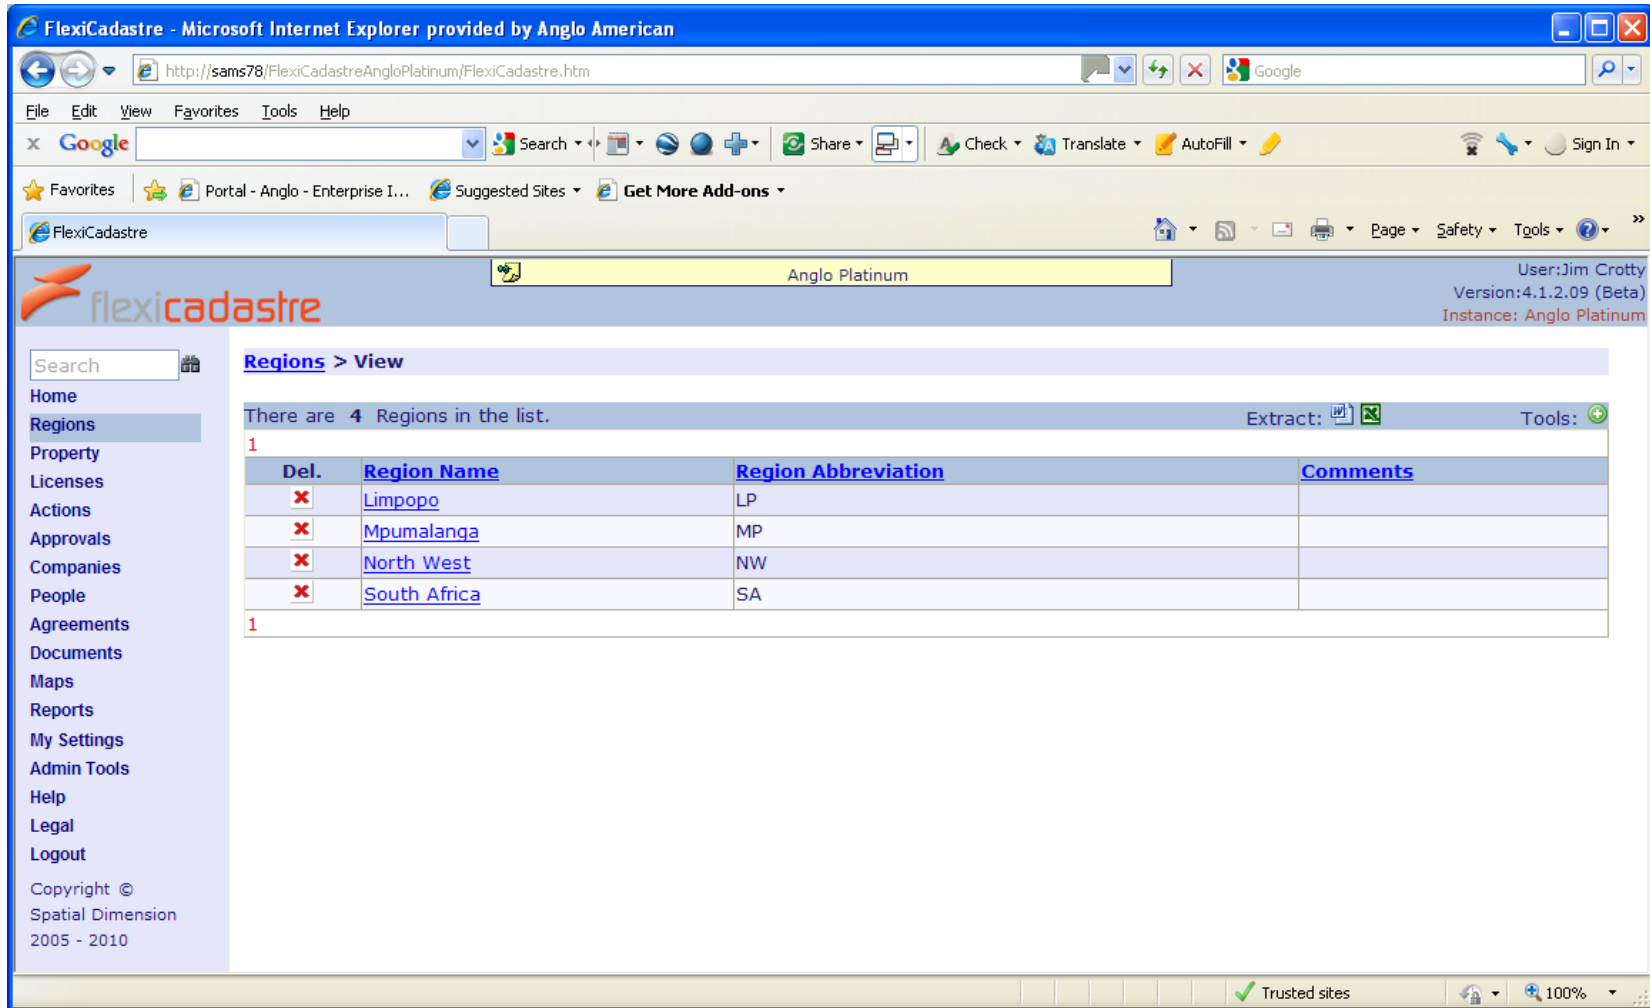

Prospecting Right High Level Work flow

Prospecting Right Detailed Work flow

License Details

The screenshot shows the FlexiCadastré web application interface. The browser window title is "FlexiCadastré - Windows Internet Explorer" and the address bar shows "http://localhost/FlexiCadastréAngloPlat2005/FlexiCadastré.htm". The application header includes the "flexicadastré" logo, the text "Anglo Platinum", and user information: "User: Trevor Ives", "Version: 4.1.2.10 (Beta)", and "Instance: Anglo Platinum".

The main content area is titled "License > Details" and features a summary table:

License Code:	M469/PR/1	License Type:	Prospecting Right	Status:	Active
License Name:	M469/PR/1	Grant Date:	11/12/2007	Expiry Date:	10/12/2012
License Parties:	DEPARTMENT OF MINERAL RESOURCES, LIMPOPO REGION (100.00%), MICAWBER 469 (PTY) LTD (100.00%)				

Below the summary table are several tabs: "General", "Parties", "Agreements", "Conditions", "Reference Codes", "Shape", "Map References", "Actions Open", "Actions Closed", "Documents", "Groups", and "Resources". The "General" tab is selected, showing a form with the following fields:

- License Code: M469/PR/1
- Jurisdiction: South Africa
- License Type: Prospecting Right
- Status: Active
- Interest: Manage
- Region: [Empty]
- Responsible Office: [Empty]
- On Hold:
- Archive:
- Application Date: 30/09/2009
- Grant Date: 11/12/2007
- Expiry Date: 10/12/2012
- PreApplication Entry: [Empty]
- License Name: M469/PR/1
- Application Number: [Empty]
- Old License Code: 322/2009
- Accounting Code: [Empty]
- Renewal Period: 0
- License Term: 4 Years 11 Months 29 Days
- License Year: 4
- Comment: Right Description: General Comment: RIGHTS ABANDONED 4 NOVEMBER 2009. Guarantees M468355 and M485609 = R60 000.00

At the bottom left of the application, the copyright notice reads: "Copyright © Spatial Dimension 2005 - 2010".

License Search Page

The screenshot shows a web browser window titled "FlexiCadastré - Windows Internet Explorer" displaying the "Licenses > Search" page. The browser address bar shows "http://localhost/FlexiCadastréAngloPlat2005/FlexiCadastré.htm". The page header includes the "flexicadastre" logo and the text "Anglo Platinum". In the top right corner, it displays "User:Trevor Ives", "Version:4.1.2.10 (Beta)", and "Instance: Anglo Platinum".

The search interface includes a search bar and several filter fields:

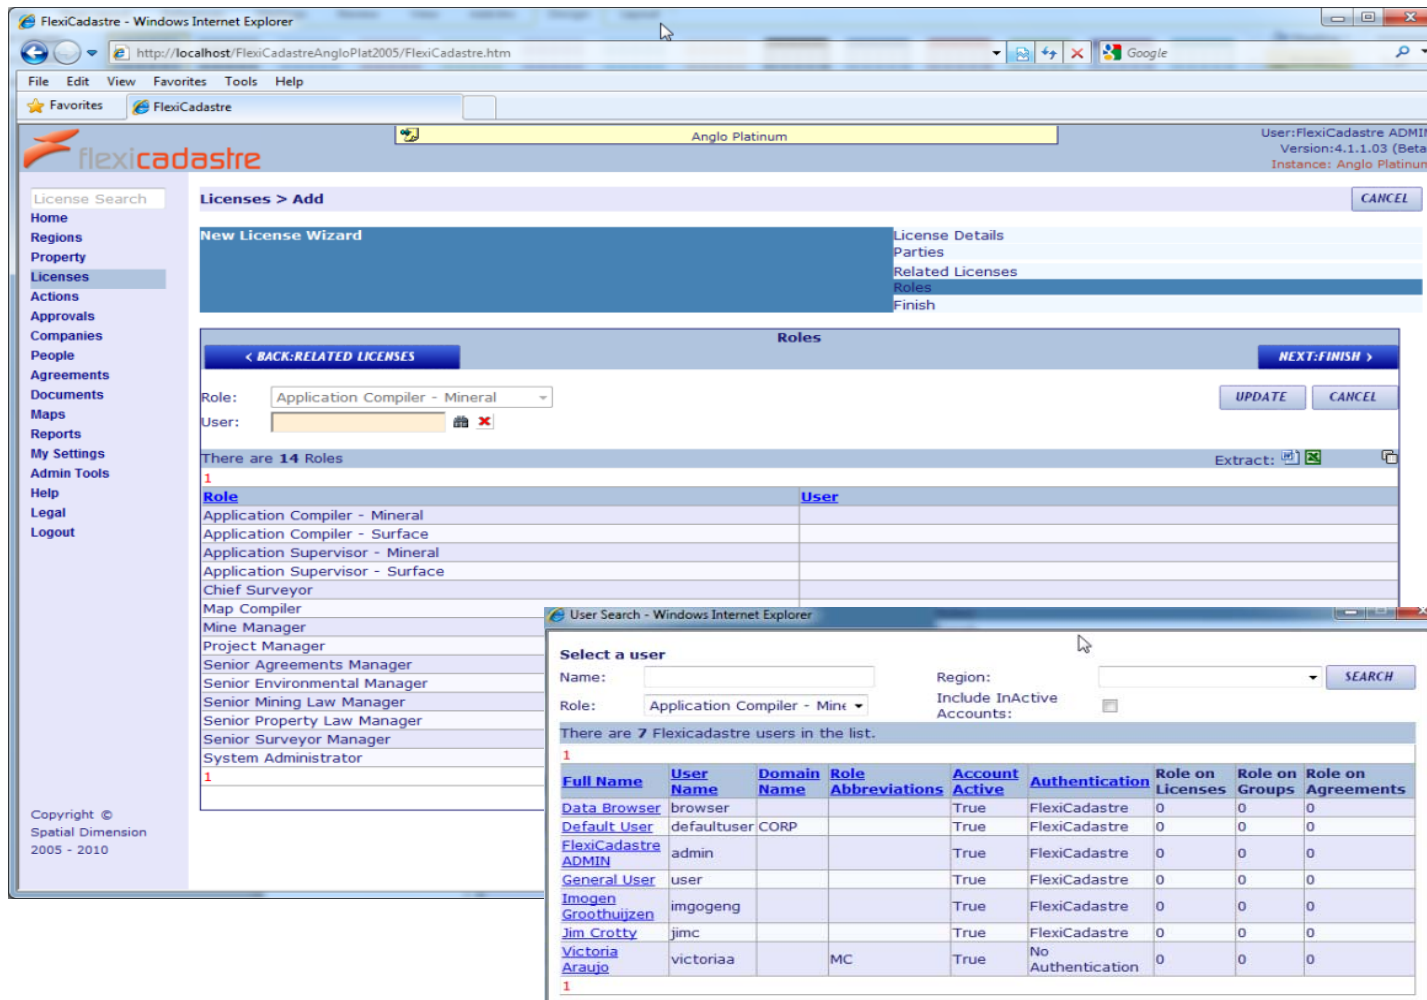

- Code:
- Jurisdiction:
- Status Group:
- Name:
- Type Group:
- Status:
- Party:
- Type:
- Saved Searches:

 There are also "Advanced", "SEARCH", "ADD", and "REM" buttons.

Below the search fields, it states "Search returned 51 results. (161053.5186 Ha)". Below this is a table of search results with the following columns: Del., All, Map, Code, Name, Type, Interest, Status, Date Applied, Granted, Expires, Official Area Value, Application Number, and Map Reference. The table contains 15 rows of data, each representing a license entry with its respective details.

License roles

The screenshot displays the FlexiCadastré web application interface. The main window shows the 'Licenses > Add' section with a 'New License Wizard' and a 'Roles' section. The 'Roles' section lists 14 roles, including 'Application Compiler - Mineral' and 'Application Compiler - Surface'. A 'User Search' dialog box is open in the foreground, showing a list of 7 FlexiCadastré users.

Roles List:

- Application Compiler - Mineral
- Application Compiler - Surface
- Application Supervisor - Mineral
- Application Supervisor - Surface
- Chief Surveyor
- Map Compiler
- Mine Manager
- Project Manager
- Senior Agreements Manager
- Senior Environmental Manager
- Senior Mining Law Manager
- Senior Property Law Manager
- Senior Surveyor Manager
- System Administrator

Pitfalls

- Trust the vendor !!
 - They know what they are talking about
- Internal workflows not detailed enough
- Internal work flows had to be remodelled to accommodated Flexicadastre
- Spatial data from external agency (government) assumed to be clean...it wasn't
- Report requirements need to be an integral part of implementation (see first point)

Conclusions

- Producing the right data model is the key to success in managing surface and mineral rights using Flexicadaastre
- We have chosen the right tool for the job
- It needs to be a dynamic process
- We feel we have produced a data model that can be applied to any prospecting / mining management requirement...independent of commodity and company
